Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a method of exposing carbon nanotubes to microwave irradiation, classified in class 204, subclass 157.15.
- II. Claims 12-30, drawn to an apparatus for desorbing an element or gas from carbon nanotubes, classified in class 96, subclass 15.
- III. Claims 34-37, drawn to a method and apparatus of implanting hydrogen in carbon nanotubes, classified in class 427, subclass 58.
- IV. Claim 38, drawn to an apparatus for welding carbon nanotube-based ropes, classified in class 219, subclass 679.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group II can be used for various processes as evident in the various processes in Group I, such as light producing, motion producing or outgassing, etc. Furthermore, the processes of Group I do not require the apparatus of Group II, any microwave source will do. Inventions Groups III and IV are unrelated independent inventions and also independent of the inventions of Group I and Group II. More particularly, the invention of Group III does not even

require microwave irradiation and the welding apparatus of Group IV does not require the implanting of Group III and cannot perform the processes of Group I and is unrelated to the apparatus of Group II.

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that a complete reply to this requirement must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
